Sixth Grade – Mrs. Bozigar

Mr. Troyer from the Lucas County Soil and Water Conservation District worked with **Mrs. Bozigar's 6th grade social studies students**. The students learned about the factors that affect the patterns and features associated with streams and floodplains. Students learned how these factors could cause changes in landscapes and landforms via an interactive program, The Streamulator Table.

PARENT QUIZ From: HELPING CHILDREN
LEARN – Issue 2022

Are you forging a school connection? Studies consistently show that when families and schools work together, students learn more and do better in school. Are you an active partner in your child's education? Answer **YES** or **NO** to the questions below:

1. **Have you talked** with your child's teacher at least once this year?
2. **Do you review** information that you receive from the school and ask questions if something is unclear?
3. **Do you make** daily attendance a priority, and help your child start each day well-rested and ready to learn?
4. **Do you discuss** why school matters with your child, and say that you think your child will be a successful student?
5. **Do you monitor** your child's effort and progress and ask the teacher how to help?

How well are you doing?

More **YES** answers mean you are building an important bridge between home and school. **For each NO, try that idea.**
